

HPWorkpathSDK | Release Note

Overview

| **Release Version:** 1.6.3

| **Release Date:** November 11, 2025

| **Release Contents:**

SDK

APIDocs

WorkpathLib-javadoc

Contains Javadoc of HP Workpath SDK API.

WorkpathLib-javadoc.jar

Libraries

Provides libraries of HP Workpath SDK API.

Features and API

| New Features and Changes:

1. Added new Authorization APIs, providing enhanced authentication and authorization capabilities.
2. Added broadcast event notifications for user sign-in/sign-out, device power state changes, and app configuration updates.
3. Enhanced the scan APIs to allow the next scan job to start when the previous scan is complete, but transmission is not yet finished.
4. Enhanced security for DeviceSettingsService.disableExternalPrinting API. This API now requires uses-permission declaration in AndroidManifest.xml. (See HP WorkpathSDK-forDevice-DeviceInfoSampleOverview_v1.6.3.pdf for details)
5. Enhanced Web service to support sub path in URI. (See HP WorkpathSDK-forDevice-WebServiceSampleOverview_v1.6.3.pdf for details)
6. Added more information in DeviceAttribute class.
7. Removed com.google.code.gson from the Workpath library to avoid conflicts with apps. If your app was using gson from the previous Workpath library, you now need to manually add the gson library to your app.
8. com.hp.workpath.api.access.Principal.getSimpleAuthorities() is deprecated and will be removed in a future release; on FutureSmart 6+ it will return a fixed list containing all SimpleAuthority enum values solely to maintain legacy application continuity.

| HPKTools

1. Updated to support HP Workpath Platform Version 31.9

The screenshot shows the HP LaserJet MFP E82650 Configuration Page. The left sidebar contains a list of navigation links: Device Status, Configuration Page (highlighted), Supplies Status Page, Event Log Page, Usage Page, Device Information, Control Panel Snapshot, Printable Reports and Pages, and Open Source Licenses. The main content area is titled 'Configuration Page' and displays various system settings. The 'HP Workpath Platform Version' is highlighted with a red rectangular box and shows the value '31.9'. Other visible settings include SRK Thumbprint, Internal Fax Line1, IP Fax Version, Embedded Jetdirect Page, LDAP Gateway, Digital Send Advanced, HP Workpath Platform (Enabled), Custom Print Table (Not Installed), HP Web Services (Disabled), and ePrint (Disabled).

Configuration Page	
SRK Thumbprint:	044B7006A07530DFAE282B4 505CB4618665822C0A98838E027ED9A857896219D 089B6BD696687F732F1E20D
Internal Fax	
Line1:	CSF.099.00.250214.04.0675.BSP.50250528
IP Fax Version:	SIPFaxEngine_1.01.00.048 Build: 14:52:41, Jun 2 2025
Embedded Jetdirect Page:	15.4.132.181
LDAP Gateway:	0.0.0.0
Digital Send Advanced	
HP Workpath Platform:	Enabled
HP Workpath Platform Version:	31.9
Custom Print Table:	Not Installed
HP Web Services	
HP Web Services:	Disabled
ePrint:	Disabled

2. Added ability to create Authorization apps

| Bug Fix:

1. Fixed an issue with incorrect PrintCustomLength and PrintCustomWidth's default value in Copy API.

| Simulator:

1. Added Authorization sample app.
2. Updated Android Emulator developer tools to the latest version.

| Restrictions:

- N/A
